Ángela Vázquez

Android Developer

avazquez.developer@gmail.com · LinkedIn · Portfolio: angelavazquezlab.web.app/en

Spain · Remote · Quick to adapt to any team · English B1 (EOI)

Android developer since 2020, working with Kotlin and Jetpack Compose on client teams of every size: from very large retail teams to a team of two, and on to banking. I also work with AI agents and, outside work, build my own products with them.

EXPERIENCE

Plexus Banking · Large-scale app Sep 2023 — Present

Native Android development on a large-scale banking app, the widest-reaching of my career. A large multi-module codebase in Kotlin and Jetpack Compose, in an environment where reliability comes first.

Babel Habitissimo May 2022 — Sep 2023

An Android team of two, with lots of autonomy and real ownership of every feature, from idea to production. 100% Kotlin codebase.

Alten Inditex Mar 2020 — May 2022

Owned the Uterqüe Android app until the brand closed, then moved on to other apps in the group. Large-scale retail in a big team, with Kotlin and legacy Java code.

WHAT I WORK WITH

Android. Kotlin, Java, Jetpack Compose, Material 3

Architecture. Clean Architecture, MVVM/UDF, modularisation, Coroutines and Flow, DI

Quality and delivery. JUnit + MockK, Compose UI Test, Detekt, SonarQube, GitHub Actions, Firebase

Tools. Android Studio, Figma, Jira · Scrum and Kanban

AI. Claude Code, Codex, Cursor · specs, context engineering and specialised agents

PERSONAL PROJECTS

Puntokus · On the App Store. Deduction puzzle for iPhone with a daily challenge and widgets. Swift and SwiftUI implemented by agents.

Puntokus on the web · Live. The same puzzle in the browser, with no install or sign-up. Built with agents; product direction, game design, specs and QA are mine.

QuestLog · On hold. Video game journal with a library, experience points and trophies. Jetpack Compose, multi-module Clean, Room and Firebase.

EDUCATION

Higher Vocational Diploma in Multiplatform App Development · IES Nervión · 2020

Vocational Diploma in Microcomputer Systems and Networks · IES Martínez Montañés · 2018

AskUs. Final diploma project (2020): Kotlin Android app with a C# .NET REST API and SQL Server on Azure.
